

BD Pyxis™ IV Prep

BD Pyxis™ IV Prep (formerly BD Cato™)

BD is bringing its IV compounding workflow solution, BD Pyxis IV Prep, into its BD Pyxis portfolio and introducing new enhancements that extend IV compounding safety to a much broader set of IV medications. The new solution, BD Pyxis IV Prep, includes even more configuration options to support hospital and health systems' operations, a guided volumetric workflow for increased flexibility, interoperability with Epic™ EMR including inbound orders and outbound NDC usage information for more accurate billing, gravimetric batching capabilities that enable anticipatory and patient-specific batching supporting a safer yet streamlined and efficient workflow, and an expanded implementation database that includes critical drug information for faster and easier implementation. BD Pyxis IV Prep raises the bar during IV compounding – offering real-time detection of errors for more accurate preparation of IVs.

Enhanced Features of BD Pyxis IV Prep:

- **Volumetric workflow option:** the addition of the volumetric option enables a guided step-by-step IV compounding workflow for circumstances where gravimetric compounding may not make sense.
- **Interoperability with Epic EMR** for inbound orders and outbound NDC usage information, enabling more accurate billing.
- **Gravimetric batching capabilities** supporting a safer yet streamlined and efficient workflow that enables anticipatory and patient-specific batching operations.
- **Expanded Implementation Database** that includes critical drug information to make it faster and easier for pharmacies to get up and running with the IV compounding solution.

About BD

BD is a global medical technology company that is advancing the world of health by improving medical discovery, diagnostics and the delivery of care. BD leads in patient and health care worker safety and the technologies that enable medical research and clinical laboratories. The company provides innovative solutions that help advance medical research and genomics, enhance the diagnosis of infectious disease and cancer, improve medication management, promote infection prevention, equip surgical and interventional procedures, and support the management of diabetes. The company partners with organizations around the world to address some of the most challenging global health issues. BD has nearly 50,000 associates across 50 countries who work in close collaboration with customers and partners to help enhance outcomes, lower health care delivery costs, increase efficiencies, improve health care safety and expand access to health. For more information on BD, please visit bd.com.

BD Pyxis IV Prep at ASHP

Visit booth #721 and be sure to join us for a special in-booth presentation on "Raising the bar for IV compounding safety," presented by Christopher S. Jerry, President & CEO of The Emily Jerry Foundation.

Wednesday, December 6
12:30 – 12:50 p.m.

Comprehensive IV Preparation

BD's IV workflow solutions help standardize and streamline the IV compounding process from preparation to documentation throughout the enterprise.

New this year is BD HealthSight™ Viewer, an integrated dashboard that allows pharmacy to view continuous IV infusion status across a hospital in near-real time. This visibility helps to improve efficiencies in the pharmacy.
