RE: Updates to Product Labeling and eIFU for the BD Vacutainer® Serum Separator (SST™) Blood Collection Tubes

Dear Valued Customer:

BD had previously communicated the release of BD Vacutainer® SST™ Blood Collection Tubes with updated labeling and the associated electronic Instructions for Use (eIFU) would begin around March 15, 2024. BD is in the process of working through a number of updates which has necessitated a change to the release date for the eIFU. The new release date for the eIFU for BD Vacutainer® SST™ Blood Collection Tubes is now scheduled for July 2024. The current version of the eIFU is still available on the eIFU website. To access the eIFU, please go to <https://eifu.bd.com/>.

The product codes in scope of this notification are listed in the table below. Additionally, please note the discontinuation of SKU 367985 with an exact replacement SKU 367990 due to these regulatory changes. There is no change to the fit, form or function of the tube.

Product Catalog Number	Product Description	Status
367977	BD Vacutainer® SST™ Blood Collection Tube, 13x100mm, 4.0mL, Paper Label	510(k) Cleared
