# Why BD?

At BD, we pride ourselves on our collaborative approach. Our customers see the value of partnering with us because we:

- Flex to meet changing customer needs
- Help inform more efficient processes and workflows
- Support long-term goals around smart, connected care

No matter your current vendors or systems, BD can help you optimize your resources with our flexible portfolio of products, software, analytics, and services to empower your staff so they can focus on what matters most – your patients.

## Putting customers first

### Expanding scale and reach

- Sourced materials, manufactured and delivered our products to customers when needed
- Maintained implementation timelines to help ensure optimal use of customer resources

### Investing in what matters

- Furthered our investments in what matters to our customers
- Strengthened our supply chain, validated secondary suppliers and built key component inventory in a supply-constrained environment

### Demonstrating accountability and consistency

- Delivered on accountability and consistency in our financial performance, planning and ability to execute

### Improving support, helping reduce complexity

- Redesigned our commercial coverage model to help reduce complexity, improve business transactions and focus on customer success and support after implementation
