

I'm a resistance fighter™

David Patrick, MD

Professor, School of Population and Public Health
University of British Columbia

Combating antimicrobial resistance (AMR)

One of the great struggles of our time is preserving the value of antibiotics and their benefit to health. From research, to health promotion, to working with colleagues in all prescribing professions, our team is fighting to reduce antibiotic resistance. We work with healthcare professionals and policy makers to limit antibiotics misuse and to implement campaigns to raise awareness and promote good hygiene practices that can prevent infections. But this battle cannot be won by healthcare professionals and legislators alone. Our fight is your fight, too. We need your help combating antimicrobial resistance, every day, through good hygiene at home and at school. **Because all of us need to be resistance fighters.**
